Technical data

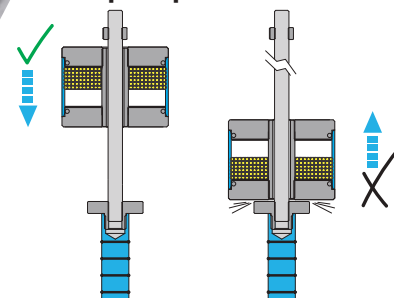

- Slide hammer with weight: 9 kg
- Total length: 770 mm
- Connection thread: M18x1.5

SLIDING HAMMER 9KG, DEAD BLOW

The principle of "no-rebound"

- For powerful expulsion of stuck components as well as for body straightening work.
- The new slide hammer version is filled with a steel shot. This prevents the weight from bouncing back against the abutment. The impact intensity is thus increased because the full impact force is transmitted to the component to be machined.
- This version is also very gentle on the joints and allows fatigue-free working.
