

KIT TO RESTORE M6 THREADS ON ALUMINUM ENGINE HEADS

UNIVERSAL

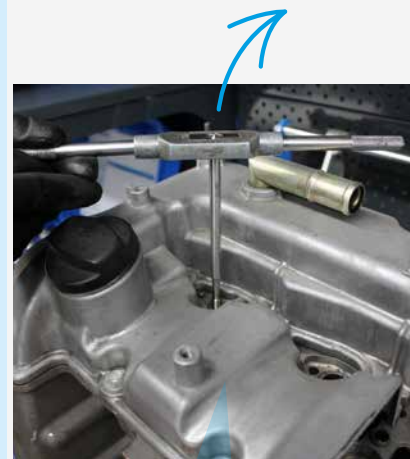

- Special kit to restore the threaded holes on the heads of aluminium heads.
- Can be adapted to restore the threads that support the injectors on diesel engines.
- Protects tapped threads against wear.

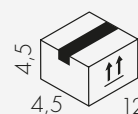

Different sets available

SET CODE	Components			
	THREAD INSERTS (10 pcs)	DRILL (Ø9 mm)	SCREW	CENTERING INSERT
GO1110	✓ M6	✓	✓	✓ M6
GO1111	✓ M7	✓	✓	✓ M7
GO1112	✓ M8	✓	✓	✓ M8

The repair is performed by mounting the threaded insert on the centering provided and, using a tapping wrench, generate standard M6-M7-M8 threads.
