"GO312EASY" PNEUMATIC COIL SPRING COMPRESSOR WORKSTATION

PNEUMATIC COIL SPRING COMPRESSOR WORKSTATION – FOR CARS AND MINIVANS.

- **SAL- Selflevelling system:**
the two self-levelling arms allow to work easily on both conical and offset springs.
- **Cylinder, stroke and thrust:**
thanks to a stroke of 330 mm it is also possible to use this machine for long shock absorbers of cars and minivans. With an operating pressure of max. 8 bar the machine exerts a compression force of 1226 kg without losing power.
- **Aluminum technology:**
the cylinder in light aluminum alloy, nylon resin and fiberglass prevents corrosion and oxidation of the internal parts of the machine.
- **Bracket holder system:**
the front bracket holder guarantees an easy replacement and positioning of the bracket **2**
- **Control valve:**
the control pedal works only when the machine is connected to the compressed air system. Consequently, the machine can be disconnected without any danger, guaranteeing maximum safety.
- **Glove compartment:**
the machine is equipped with a practical and safe glove compartment
- **Fixed position** not removable.

Technical data

- The machine complies with the
- Machinery Directive 2006/42/EC
- Operating pressure: max. 8 bar
- Cylinder stroke: 330 mm

Air consumption:

	VACUUM CYCLE CONSUMPTION	LOAD CYCLE CONSUMPTION
m³/h	0,07	0,03
lt/min	1,17	0,5

OPTIONAL

	GO341	Ø78÷130 mm small bracket
	GO343	Ø125÷205 mm large bracket
	GO313	Floating upper clamps
	GO332	Clamp for shock absorber stem Ø 40-60 mm
	321103003	Shock absorber support
