

MANDREL PRESS PINS SET

UNIVERSAL

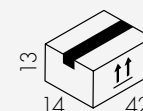

- Useful supplement for every workshop press up to 25 tons.
- With the help of the press mandrels, small components up to 29mm can be squeezed out safely.
- The press mandrel support can be attached directly and permanently to the piston of commercial workshop presses. Depending on the diameter of the piston, it can be picked up directly or with the aid of the supplied reducing sleeve. For unusual piston dimensions, there is also a reduction sleeve for self-adjustment by means of lathe in the scope of delivery.
- By using the pressure plate in the press mandrel holder, pressure is active on the whole piston surface. The press mandrel holder can thus remain permanently mounted on the hydraulic piston.
- All parts are neatly stored in the supplied shelf directly on the press table.

Components

- 5 x items for Press pin with ball lock, Ø11-15-19-25-29mm
- 1 x item for Pressure plate for press mandrel holder Ø60mm (H = 10mm)
- 1 x item for Mandrel holder for pistons Ø50mm (outer Ø60mm)
- 1 x item for Reducing sleeve Ø50 to Ø40mm
- 1 x item for Self-adjusting reducing sleeve for pistons Ø30-45mm
- 1 x item for Storage hanging for press table
