

UNIVERSAL C-BRACKET

- With the aid of the C-bracket and the optional matching pressure pieces carrying joints, silent bearings, bushings and sleeves are directly pressed on and out of the vehicle.
- The tool is supplied with a trapezoidal thread spindle Tr27 **1**, and the removal of the threaded adapter enables the retrofitting of the 16to Mechadraulic spindle (GO1016) **2**.
- The tool is supplied with n.2 adapters that allow the direct removal from the pressure plates from the Govoni GO140 "Universal tool set for the dismounting and mounting of bushes, bearings and sleeves"; and n.2 adapters suitable for all the systems sleeve mounting plates present on the market.

Impact wrenches can be used with the ball joint puller to complete the task more quickly

Components

- 1 x C-bracket with threaded adapter AG 1-1/2"-16to x IG Tr27
- 1 x trapezoid thread spindle Tr.27x250mm
