HYDRAULIC FOLDING CRANE UP TO 1000KG

- The hydraulic workshop crane can be used for lifting mechanical components up to 1000kg. The metal structure is equipped with a hydraulic cylinder, powered by a manual pump. The hydraulic cylinder allows the fixed position of the lifting arm, when the load is hanging, and the crane can be moved by hand, positioning the load where needed.
- The hydraulic cylinder also allows you to modify the inclination of the lifting arm which can be positioned according to the load to be lifted.
- It is provided a hook to hang the load that it is certified to support a load up to 1000 kg.

THE CRANE CAN BE USED IN 4 LOADING CONFIGURATIONS, BASED ON THE EXTENSION OF THE LOADING ARM:

CAPACITY (kg)	
POSITION	
1	1000
2	800
3	600
4	300

Technical data

Folds in a few seconds, takes up very little space when repositioning.

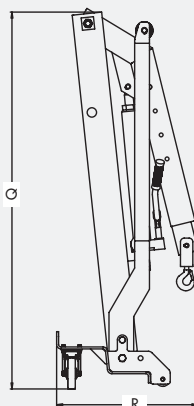

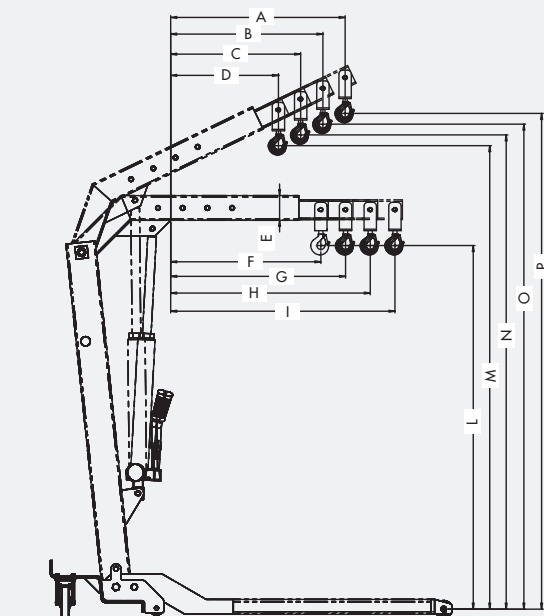

Long lasting thanks to the refaced and chromed stem

Extendable arm in four working positions.

Swivel rear wheels for maximum handling.

360° rotatable hook

Two-speed hydraulic pump
