

HOSE REMOVAL PLIERS WITH LOCKING MECHANISM

- For disconnecting hose connectors by gripping them and securing them precisely on the hose, especially when it is not possible to apply pulling forces.
- Particularly suitable for sleeves connected to hoses or lines with a smooth surface, where no pulling force can be applied. *The force required is minimal thanks to the effective stripping action.*
- The pointed jaw allows access to the tightest areas.
- The special locking design ensures a secure grip on the hose.

NEW

APPLICATION

Suitable for hoses and flexible lines of 4.8 mm (3/16"), 6.4 mm (1/4") and 9.5 mm (3/8")

TECHNICAL DATA

Length 205mm
Width 94mm
Material chrome-molybdenum steel
Weight 340g

Loosening and stripping with a bevelled V-shaped element

Handle with 3 positions
