- The set of pliers is required to clamp hoses during repairs or component replacement, preventing fluid leakage and the ingress of contaminants.
- Suitable for various lines, including brake lines, fuel lines and power steering systems.
- The black pliers feature a swivelling cone that automatically adapts to the required sealing angle. The blue pliers seal both sides of a fuel or brake line connector.

SEALING AND PROTECTIVE PLUG SET

Material: rubber resistant to
fuel, oil and brake fluid.

Application

Universally applicable, e.g. for fuel,
pressure and vacuum lines, etc.
Universal for cars, commercial
vehicles, agricultural machinery, etc.
