## FUEL LINE DISCONNECT TOOL FOR FORD, VAUXHALL

- Compact release and unlocking tool for metal quick connections in the engine compartment of Ford Ecoboost models and Opel.
- Unfavourable space conditions make it almost impossible to loosen the fuel line connection without this special tool.
- The use of this special tool is strongly recommended to prevent damage and thus leaks at the metal connection.

### Application:

To be used as OEM Ford 310-137 / Opel -50637  
Suitable for Opel fuel filters: Opel 818.568 / Vauxhall 25313359

### Application

| Brand | Model                      | Engine                    |
|-------|----------------------------|---------------------------|
| FORD  | C-Max (from 2003)          | 1,0 L Duratec (GDi),      |
